Summary

Computer Science Undergraduate Seeking an internship and entry level Software engineer position to apply my problem solving skills, programming skills, Critical Thinking, Continuous Learning and a strong interest that I have on Artificial Intelligence, Data Analytics and gain real-world Technical exposure.

Education

B.Tech Vardhaman College of Engineering, CSE

Hyderabad
Aug 2024 – Aug 2028

Experience

Ediglobe, Artificial Intelligence Intern

Jan 2026 – Mar 2026
2 months

- Completed an internship in Artificial Intelligence, demonstrating strong problem-solving skills, effective communication, a commendable work ethic, and a genuine eagerness to learn and grow.

Projects

COVID-19 Data Analysis Using Python

- Developed a Python-based COVID-19 data analysis project using Pandas, NumPy, Matplotlib, and Seaborn. Performed data preprocessing, exploratory data analysis and analyzed recovery trends, regional cases, and infection patterns.

Heart Disease Prediction Using Artificial Intelligence and Machine Learning

- Developed an AI/ML-based heart disease prediction system using Logistic Regression, Decision Tree and Random Forest. Performed data preprocessing, Exploratory data analysis and model evaluation.

Skills

Programming Languages: C++, python, java

Technical skills: AI Fundamentals, Machine Learning Basics, Data Analysis, Problem Solving, Analytical Thinking

Soft skills: Communication skills, Teamwork, Public speaking, Adaptability, Time Management

Certifications

Artificial Intelligence

EdiGlobe
Mar 2026

Full Stack Development

Simplilearn
Jul 2026

Achievements

Secured second position in Innovex 2025 Hackathon

- Technical and professional exposure event Organized by Connect Club, Vardhaman College of Engineering

Secured First Position in Time Traveller's Tales

- Public speaking activity organized by the Department of English, Vardhaman College of Engineering
